SUMMARY

I am a Computer Engineering student skilled in Python, SQL, and web development. I enjoy leveraging my analytical and problem-solving abilities through academic projects involving user-friendly digital experiences. My aim is to pursue roles in Q&A, Testing, Full stack Development or analysis to further enhance user satisfaction and engagement.

STRENGTHS

Attention to Detail , Fast Learner , Team Collaboration, Hard worker and Smart worker

EDUCATION

Bachelor of Engineering - Computer Engineering

M.H. Saboo Siddik College of Engineering

Mumbai

11/2022 - Present

HSC (Science)

Valia Lilavantiben Chhaganlal Junior College

01/2021 - 03/2022

SKILLS

Html, CSS, Javascript, Python, Django, SQL Server Management Studio, SQL, AWS Cloud, Postgresql, React, Node.js, JupyterNoteBook

PROJECTS

Redience Academy Management System

01/2026 – 04/2026

Redience Academy Management System: Django & Python

- Developed a web-based system to manage academy students and records.
- Implemented secure admin login and dashboard using Django authentication.
- Created modules for students, education, marks, fees, addresses, and documents.
- Used Django ORM for efficient data handling and validations.
- Designed a simple and user-friendly interface using HTML and CSS.

Online Grocery Shopping System

09/2025 - 12/2025

Online Grocery Shopping System: Django & Python

- Designed a simple online platform for groceries with product listings and user login
- Built backend features for managing orders and storing user information efficiently
- Created a user-friendly interface using HTML, CSS, and JavaScript for smooth navigation
- Improved the shopping and checkout flow for easier user experience

Women Safety App ("Her Shield")

07/2024 - 05/2025

Women Safety App ("Her Shield"): React & Node.js

- Developed a clean and intuitive interface for SOS alerts and help access
- Built backend features like notifications, alert handling, and authentication
- Added basic location-sharing features for user safety
- Focused on fast access to emergency features through simple app design

Retail Sales Analytics

08/2024 – 12/2024

Retail Sales Analytics: Python & Jupyter Notebook

- Cleaned and analyzed retail sales data using Python for better understanding
- Observed trends in product performance and monthly sales patterns
- Built interactive Jupyter Notebook for visualization
- Turned raw sales data into helpful insights

Library Management System

04/2024 – 7/2024

Library Management System: Python & SSMS

- Designed and developed a Library Management System using Python with SQL Server (SSMS)
- Implemented database operations for book records, members, issue/return tracking
- Managed CRUD operations and optimized queries for efficient data handling
- Maintained relationships between books, users, and transactions
- Automated record management to reduce manual work and improve accuracy
